## TALLY CUSTOMIZATION

### What is Tally customization?

Every organization during its journey creates its own niche which puts them into the growth path. This leads to unique business requirements which require to be incorporated in to the standard Tally software. Business Growth demands change in business processes, securities & controls, Management Information Systems (MIS), atomization at various levels, integration of different functions & software.

The default Tally ERP 9 is packed with powerful functionalities & feature which would address 90% of the businesses. The balance unique requirements can be incorporated by customizing Tally. In a way Tally provides best of both the world i.e. Packages software & customized software. Customize Tally to fit in exactly the way your business or organization wishes to operate.

### Benefits of tally customization

- ✓ Effective use of the Power of Tally ERP 9.
- ✓ Increases user Performance & productivity.
- ✓ Reduce cost of Business Operations.
- ✓ Create significant business advantage over competition.

### How is tally customization done?

Tally ERP 9 is architected to be a platform and is designed to support extensive Tally Customisation. Tally ERP 9 comes with an execution Kernel, an interpreter and a development language Tally Definition Language (TDL). Using TDL, you can enhance or change the default behavior of Tally ERP 9. Extend core functionality by interfacing a bespoke application facilitated by Tally ERP 9's support for custom built DLLs and XSLT. Tally ERP 9 supports ODBC and import & export of data in standard data formats like XML & CSV. Tally ERP 9 has a SOAP listener, which helps in online integration and with other business tools.

### Tally customization process

Sash Software Services interacts closely with the customers, understand their business functions, Business Specific Solutions needs, processes & documents it. The team then checks how much of the requirement can be satisfied by using the default functionality of the Tally software. If there is a Gap, it is identified and taken up for Tally Customisation. In a way Sash Software Services make sure that the customer takes maximum advantage of Tally strengths.
